ENGINEERED ROTATING EQUIPMENT SPECIALISTS

UNICO MECHANICAL

ENGINEERED ROTATING EQUIPMENT SPECIALISTS

SERVICES OVERVIEW

The West's Premier Industrial Service And Support Provider

Bender CCP & Unico are two of the leading full service providers of engineered equipment repair and machining services in the US. With a reputation built on decades of providing reliable, quality services in our facility or at the customer site, we are your go to trusted partner. We work around the clock and in the most demanding conditions bringing deep expertise across a variety of customer industries from oil and gas, chemical, mining and marine to pulp, paper, steel and more.

Valve & Turbine Overhauls

Providing comprehensive overhauls and rehabilitation services for the nation's leading OEMs and Hydropower Stations.

Welding & Fabrication

Our Certified Weld Inspector, Mobile Welding Truck, Extensive Certifications and Procedures allow us to fabricate the highest of quality industrial parts and equipment. Our welding capabilities include, but are not limited to; Steel Pipe / Stainless Steel Pipe • P1 through P-11, P34 and P-4X • Steel Plate • GMAW, GTAW, and SMAW • FCAW – Four different processes. Aluminum 6060 T6 welds up to 1.5-inches thick • Steel to stainless steel • FCAW and SMAW up to 2-inches thick plate and cladding • Fully-equipped welding rig for onsite projects.

Machining & Grinding

Our large-capacity machine shops include a wide-range of capabilities to refurbish over-sized and heavy machinery components as well as fabricate parts to OEM specifications. We are an ASME coded manufacturing and repair facility with a 50-ton lifting capacity, horizontal turning up to 90-inch diameter parts, 40 feet between centers and vertical turning up to 12-foot diameter and 10-foot tall parts.

Millwrights & Mechanics

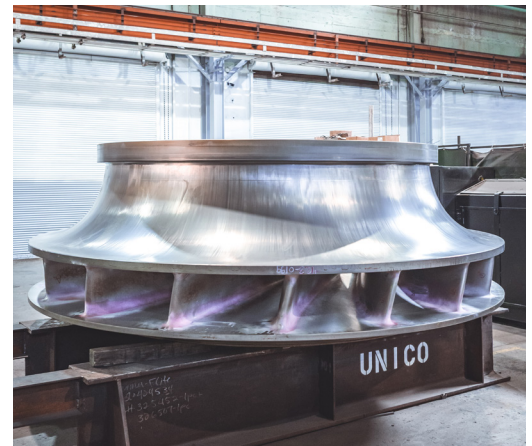

Equipment installations, service, and upgrades including rigging, leveling, alignment, lagging, and more.

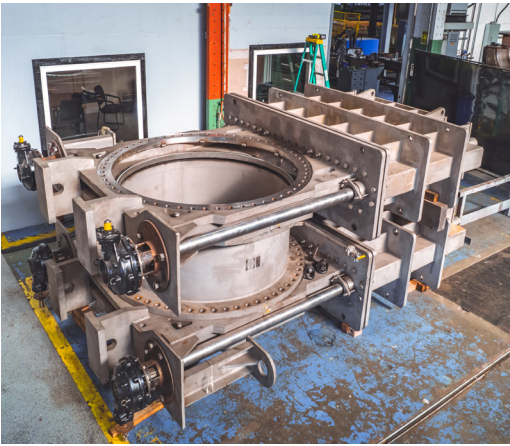

Field Services - Maintenance & Manpower

Preventative and proactive maintenance, troubleshooting, vibration and oil analysis. Onsite machining, milling, and welding.

Machinery Bases and Foundations

Superior machinery bases and foundations that are fabricated to reduce equipment maintenance and reduce time between failures.

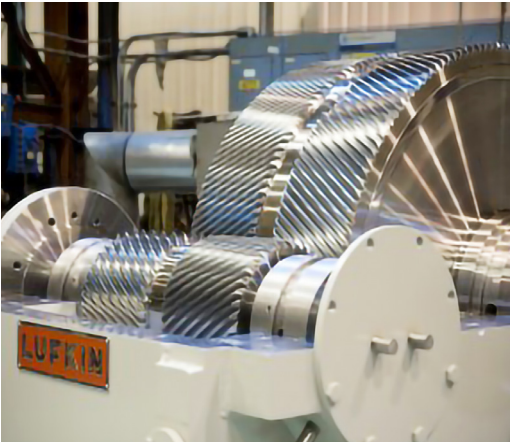

Pump & Valve Repair

We are experts in all things related to Hydro Valves & Pumps, including pelton relief valves, butterfly valves, ball valves, knife gate valves, slide gate valves, centrifugal pumps, circulating water pumps, American Petroleum Institute standard pumps, irrigation pumps, sewage pumps, and much more.

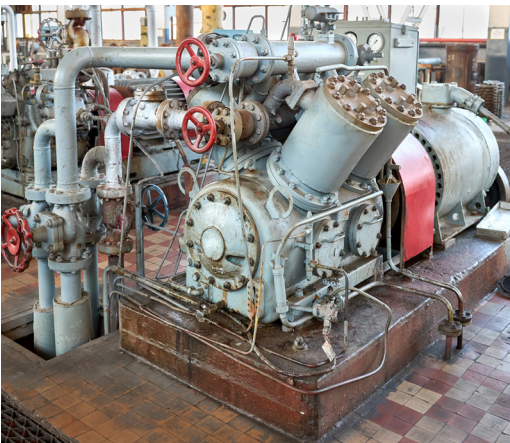

Gearbox Repair

Our staff are experts at repairing, servicing, and installing OEM gearboxes made from all types of materials including steel, cast iron, and more. We have the capability to provide complete gearbox solutions from CAD drawings and modeling to parts fabrication and installation.

Blower Repair

We proudly provide many services such as routine and preventive maintenance, troubleshooting and repairs, replacement parts and complete installations to a variety of blower types like; multi-stage centrifugal, turbine driven and more.

Compressor Repair

Complete maintenance and repairs, recondition and manufacture parts to OEM specifications. Compressor brands include but are not limited to; Quincy, Sullair, Gardner, Denver, Crocker, Kaeser, Atlas, and Copco.

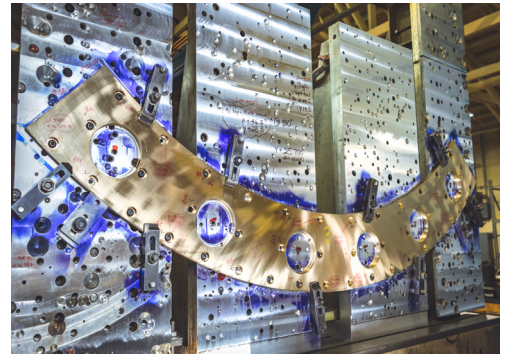

Thermal Spray

With experience in the development and application of thermal spray coatings that spans half a century and extends around the globe, Bender CCP & Unico's service, technical expertise, and performance are unsurpassed. Our coatings are purpose-built to optimize the surface performance characteristics for a specific application-wear-resistance, thermal barrier, corrosion resistance, lubricity, conductivity, traction, release, and so on.

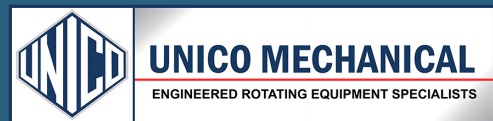

Reliable and Cost-Effective Solutions For Evolving Industries

- Today, perhaps more than ever before, large-scale industries need reliable and cost-effective solutions to optimize operations, replace aging infrastructure, and successfully address new challenges and opportunities.
- Few companies in the West can match Unico & Bender CCP's combination of machinery, talent and commitment to quality that is required to meet these needs.
- Leading refineries, chemical plants, hydro-electric power and water providers, maritime companies, food processors and more utilize our proven expertise.
- Our seasoned millwrights, machinists, mechanics, welders and other skilled employees are dedicated to delivering a standard that will forever improve with Unico's commitment to the ISO 9001 Quality Management System.
- With a nationwide shortage of skilled people to replace a retiring workforce, Unico is developing a forward-thinking training program that will help insure our customers have consistent and long-term support for their industries.
